Summary

Software Developer with a diploma in Full Stack Software Development and a BSC in Computer Games Development. I enjoy building responsive web applications using React, JavaScript, Python and Django, with a focus on creating practical, user-friendly solutions. I'm currently developing my skills in TypeScript and building new portfolio projects, while looking for an opportunity to continue developing as a front-end or full-stack developer.

Skills

- JavaScript (ES6+)
- TypeScript (Learning)
- Python
- HTML5
- CSS

Frameworks & Libraries

- React
- Django,
- Django REST Framework

Databases & Web APIs

- PostgreSQL
- REST APIs

Tools:

- Git
- GitHub
- Vercel
- Heroku

Projects

Holiday Entitlement Calculator (2026)

A React application that calculates employees' remaining holiday entitlement based on their contracted hours and working pattern. Building this project helped me improve my understanding of business logic, validation and writing calculations that reflect real business rules.

- Built using React and JavaScript.
- Added validation to ensure accurate calculations.

Technologies: React, JavaScript, CSS

Tech Buddy - Hackathon Project (2025)

Tech Buddy is an AI-powered web application developed during a hackathon to help users with common technology-related questions. The application uses the OpenAI API to generate responses and was built as part of a team using GitHub and pull requests. It gave me valuable experience working as part of a team and collaborating on a shared codebase.

- Worked as part of a team during a hackathon.
- Used Github and pull requests to collaborate.

Technologies: Django, OpenAI, CSS

Souls Like Gallery (2024)

Souls Like Gallery is a full-stack web application where users can create an account, share posts and interact with other members of the community. This project taught me how to build my own REST API, connect a React frontend to a Django backend and implement authentication and CRUD functionality.

- Built my first REST API using Django REST framework.
- Connected a React front end to a Django backend.

Technologies: React, JavaScript, Django REST, CSS

Work experience

Real Time Analyst - InsureandGo UK (09/2024 - Present)

- Produced operational reports using Excel to support workforce planning.
- Built a schedule adherence report using PivotTables to improve reporting.
- Analysed operational data to identify trends, anomalies and performance issues.
- Created a Google Apps Script to automate phone number extraction and formatting.
- Built a Power Automate flow to automatically send emails.
- Developed a Holiday Entitlement Calculator to automate entitlement calculations.
- Supported workforce planning by monitoring performance and reporting against business requirements.

Inbound Sales Agent - InsureandGo UK (02/2023 - 09/2024)

- Delivered customer support and resolved complex queries
- Met performance targets while maintaining customer satisfaction

Education

Diploma in Full Stack Software Development - Code Institute (UWS Credit Rated)
(08/2023 - 08/2024)

BSc Computer Games Development - South Essex College (09/2019 - 05/2022)
