## Summary

---

Software Developer with a Diploma in Full Stack Software Development and a BSc in Computer Games Development. I build full-stack web applications with React, Django and PostgreSQL — including authentication, REST APIs and CRUD functionality — and apply the same skills in my current role to automate reporting and build internal tools. Currently expanding into TypeScript. Looking for a front-end or full-stack developer role where I can keep building practical, user-focused software.

## Skills

---

- Languages: JavaScript (ES6+), TypeScript (learning), Python, HTML5, CSS
- Frameworks & Libraries: React, Django, Django REST Framework
- Databases & APIs: PostgreSQL, REST APIs
- Tools & Workflow: Git, GitHub (pull requests, code review), Unit Testing, Vercel, Heroku

## Projects

---

### Souls Like Gallery — Full-Stack Social Web App (2024)

[Live site](#) | [GitHub](#)

- Built a full-stack community platform where users create accounts, share posts and interact with other members.
- Designed and built a REST API with Django REST Framework, covering full CRUD functionality and token-based authentication, backed by unit tests.
- Connected a React front end to the Django backend, managing state and API integration end-to-end.

*Technologies: React, JavaScript, Django REST Framework, CSS*

### Holiday Availability Tracker (2026)

[Live site](#) | [GitHub](#)

- Built a holiday availability calendar with colour-coded day states (available, limited, unavailable) and month navigation.
- Implemented a day drill-down view showing remaining allowance, booked days, holiday limits and employee approval status.

*Technologies: React, JavaScript, Tailwind CSS*

### Holiday Entitlement Calculator (2026)

[Live site](#) | [GitHub](#)

- Built a React application that calculates employees' remaining holiday entitlement from contracted hours and working pattern.
- Implemented input validation to keep calculations accurate against real business rules, based on a version I originally built for use at work.

*Technologies: React, JavaScript, CSS*

### Tech Buddy — Hackathon Project (2025) — 2nd Place

[Live site](#) | [GitHub](#)

- Built an AI-powered web app in a team hackathon setting, using the OpenAI API to answer common technology questions, collaborating via GitHub pull requests.

*Technologies: Django, OpenAI API, CSS*

## Work Experience

---

### Real Time Analyst — InsureandGo UK

09/2024 – Present

- Built and deployed a React-based Holiday Entitlement Calculator, replacing manual calculations and reducing errors in entitlement tracking.
- Created a Google Apps Script to automate phone number extraction/formatting, and a Power Automate flow to auto-send emails as part of daily reporting.
- Built a schedule adherence report using Excel PivotTables and analysed operational data to identify trends and performance issues, supporting workforce planning.

### Inbound Sales Agent — InsureandGo UK

02/2023 – 09/2024

- Delivered customer support and resolved complex queries while meeting performance targets.
- Maintained high customer satisfaction in a fast-paced, target-driven environment.

## Education

---

- Diploma in Full Stack Software Development — Code Institute (UWS Credit Rated), 08/2023 – 08/2024
- BSc Computer Games Development — South Essex College, 09/2019 – 05/2022
